

Trekkers Tracking System

The SRPC-RRS will receive the electric wave of the eID tag carried by the trekkers and relay the position of the trekkers once they pass through it. The passage record of the trekkers can be viewed through the internet. In case of emergency, the trekkers will press the SOS button, the warning is displayed on the screen. In addition, using the sensors, the SRPC-WD can relay the data such as temperature, humidity, wind speed, wind direction.
